FOG

Installation à faire sur une machine Debian Graphique

Via le navigateur = >https://fogproject.org/download.php

Télécharger le fichier .tar.gz

Exemple : /home/tssr/Téléchargement/fogproject-1.5.10.1734-0-g09a1303.tar.gz

Avec votre terminal :

```
cd /home/tssr/Téléchargement/
tar -xzvf fogproject-1.5.10.1734-0-g09a1303.tar.gz
cd FOGProject-fogproject-09a1303/bin
```

Si proxy : rajouter les commandes suivantes :

```
export http_proxy="http://172.20.0.246:3128"
export https_proxy="http://172.20.0.246:3128"
sudo -E ./installfog.sh
```

Merci Olivier 😉

Si pas de proxy

```
sudo ./installfog.sh
```

```
Version: 1.5.10 Installer/Updater
